## South bend 9a parts breakdown

Home &gt; Catalog Number &gt; Part List Book book contains part names and numbers, plus exploding assembly views, lubrication charts and accessories catalogs. The link for each book takes you to a page that shows the catalog number of the intended shelf. Some parts and assemblies are no longer available and are not included in the price. 09-16-2007, 01:25 am #1, thanks to many suggestions from South Bend Forum members, here is a list of useful links for South Bend machine owners and enthusiasts. If you no longer know what you need to add to this list, publish it to the thread associated with it above. If you know of a link that has changed or expired, please send us a private message and edit it or delete it. Paula (Appendix: Most links in this thread can be accessed by clicking on bold, navy-colored text with the description of the link. In early 2009, the South Bend Lathe name and parts business was purchased by Grizzly Industries owners of Lakeland USA, and they bought the same thing in South Bend Lathe (originally) because they are no longer manufactured. This situation is so clear on the price. South Bend Lathe Co. is a place to get information about vintage South Bend machines (most models), and you can also get information about the date of manufacture, who originally sold them, special options, etc. The cost is currently \$25 for this service and is accessible online. A serial number is required. For shelves, these numbers can usually be found at the extreme right end of the front bed. Steve Brooks-Steve is the staple of this forum. It is famous for its turnkey felt kits. He also gives lubricants and other restored lugs for South Bend. He owns eBay and amazon stores, eBay-Steve w/ eBay Store Amazon- rb\_3d\_...-million-rebuild Ron &amp; Ron- a longtime collector of South Bend machines and accessories, they can have what you are looking for. Contact Ron via a private message (click on the link above) to confirm availability. Ron &amp; Ron- Holly also sold on eBay from the username uspenelope100. Many satisfied customers. SBLatheman (to Jim) - SB Forum member SBLatheman (To) has a large stock of NCS parts Contact Jim at [Email Protection] for pricing and availability. SBL Workshop - This is a great website for forum member Steve Wells (Stowell). You can find vintage SB, literature, hand screw parts/services, repair instructions, restoration photos, and more. Tool&cheap - The Jeff Beck website sells a variety of new used parts, machine tools and accessories, including some reproduced parts for South Bend. Check out this thread to read what some SB forum members think about Tool&cheap. Miller machinery and manufacturing - a highly regarded supplier of mechanical parts, mainly replacement supply screws and nuts. It also offers headstock spindle restoration. South Bend Information Plate &amp; Tag-Forum member Jim Cood is providing his professional services to relive various South Bend nameplates, gearbox plates, information tags and more. Jim also offers a refurbishment of the existing plate. Brass Oiling Hole Plug- Forum member Dennis Turk has recreated the brass ball oiling hole plug for an old shelf. Also see this link for the latest sources. Ailsam Engineering - Play ing South Bend accessories metal late accessories including knockout bars, tool grinding blocks and more - machine-it-yourself kits for a wide range of shelf accessories, mainly to fit 9-10K shelves. The fast and friendly service of owner Andy Loftus-Cut with detailed drawings and clear instructions included in each kit. Baltimore Belt - a great source for custom made flat belts. Bob Deppa - South Bend parts are not, but it is a good place to buy standard fasteners in small quantities.

Lathe co uk  
Start the Lathe quest here. It is also recommended to inspect used milling machines for prospective milling buyers, and to make the most of the worn shelves with the praise of the dunkus (sic) Lindsay Books - A reprint of how to run the shelves, the manual shelves of South Bend shelf users, and almost all of those copies made so far were included in the South Bend shelves. Very recommended reading. Ozark Carpentry - Quality reprint of South Bend machine manual. WESWilliams - An excellent online collection of vintage South Bend literature from practical mechanics forum members and former tape monkeys. Other machine tool brands are also recommended. How to use Lathe - Don't be confused with how lathe is running, this is a very detailed online educational paper. Good for beginners. Sponsored by the American Machine Tool Company. SBL Workshop - Although it is already included in the Parts section, this site should be included here due to the sheer amount of south bend information that resides here. Shop and f - useful machining and general store data. Yahoo South BendLathe Archive - This is a collection of On yahoo South BendLathe forum, categorized by topic. Canadian SBL Forum member Padraig, 9 Shelves Army Manual - Online copy of SBL shelf manual and parts list. 7 Shaper Army Manual - Online copy of 7SB Shaper Manual and Parts List. Turning Text - This is like hercus, equivalent to running a shelf in South Bend. Hercus is an Australian clone of South Bend. Good reading. The title says everything - the reversal and repair of electric motors. Old woodworking machinery - many carpentry machine sites, but it contains many South Bend publications. Continue in the next post... Last edited by Brad Jacob was edited by 05-24-2017 at 08:36 AM. Why. Updated Sheet Link 12-21-2007. 12-18 pm #2 More links. \_\_\_\_\_???

- Charlie's fascinating story of the structure of 9 hercus (SB clones). I noticed why my star knob screws didn't come out! In 1952, the South Bend 13 x40Lathe was renovated - professionally explained and presented by SB Forum member Gray Rider. According to forum member "Segrin", this is a well organized, very thorough, and well documented account of a reconstruction that ripped sb13 in the mid-50s. I've found it very helpful to work on my own SB13. \_\_\_\_\_ A fascinating account of the reasons behind the failure of South Bend Lathe's employee stock ownership plan. Written by Norman G. Culland. CPI Inflation Calculator - I use this handy resource to help me relate the price of vintage SB catalogs to our inflated currency system. Ball Turner Planning - Forum member has designed a rotating attachment to see for the Horse Creek shelf. This turned out to be a very popular item. The pictures and drawings that are available in this link. 12-23-2012 12:38 AM Why. Removed Dead Link 11-24-2008. 11-26 am #3 I have cross feed nuts and repair kits for replicating South Bend, Logan, Atlas, and shelves. PM for pricing and availability. Thanks Mike 11-27-2008. 05:47 pm #4 If people want to make their own reverse screw and white image that you can use to look brass. For available plates... Mike Beryk 12-29-2008. 08:03 am in all possible copies of popular mechanics 1900-2000+ and popular science 1870-2000+ are free to read. 10-18-2009. 09:23 am #6 I am now also rebuilding half the nuts. Call 913 636 6107 for pricing. Thanks Mike attached preview 07-28-2010. 03:29 pm #7 I thought some people may be interested in seeing what they used to be on the South Bend website before buying Grizzly. I looked up it on the Wayback machine and found the archive almost completely (i.e. there are almost no broken links). The most recently saved version. For those who are not familiar with South Bend shelves and machine tools, wayback machines (yes it is really called) is a project to create a continuous archive of the Internet. All of it Index (visit your site on a regular basis, and save the sites you find. It is a very useful tool to find disappeared old websites. Jon 12-29-2010. 12:47 pm #8 Some of us who used Teflon grease on an old shelf marked with oil, not oil, in the hole experienced a warm cone pulley problem. For more information, see this thread. When you run the gear again, pulleys are warm. Any advice? 01-19-2011. 09:21 pm #9 some shelves use dome head bolts on bearing caps, perhaps elsewhere - Caps of 11 and 10 are 7/16 14pi with 5/8 heads. I found that the 1026-1027 Model T-Ford uses domehead bolts on many things, one for cylinder heads 7/16 14pi and 5/8heads, probably should be shortened for use on the shelf. They can be used in nickel-plated or black oxide al a very good price from king's old car parts. Edited by Jim Cade; 01-19-2011 09:22 PM. Why. Change ut 03-24-2011. 04:11 pm #10 don't bother trying to clean a very old belt. I contacted John Knox of The News Day (Google John Knox, leather belts) and told me not to send a check until it was skid and stuck with contact cement at the right length. My SB 9B and much more torque run smooth! Old leather will not return to the new specification. And the new belt was very affordable. 2 additional links to the South Bend Yahoo Forum area at 04-01-2011. 10:58 am #11. These two are Heavy 10 models and are a great source for information about 10L and R machines. Southbendheavy10: South Bend Heavy 10 Belts edited by Last Paula. 12-23-2012 12:37 AM. 05-31-2011. 08:11 am #12 buy a new flat belt for my Heavy 10. Albino Machining &amp; Flat belt I just bought an insertable belt Pin, works well! Excellent customer service. Best of all - Price! I hope this is useful. Edited by Mitch Smith and Paul Last Chan; 05-31-2011 2011. Reason: Edit the link bet 11-04-2011. 12:52 pm #13 hey man and oh, how I take your attention. I don't know if this has ever been raised. But in the Career and Technology Center. I've found a lot of tooling (chucks, collets, face plates, steady breaks) online. This site is published below. Many schools are dropping technical subjects. I think replacing it with hair styling and music management. (I wonder why we go to hell in a hand basket). In fact they are dropping it because they can't find a teacher... We're all retired. Anyway they won't ship, find a school or school district in your area, you will have to go inspect things, those who sell it don't pretend to have three chairs from pretending to be ground, but the prices here are real/cheap. Remember the teacher who retired last year. Sign up for the sale, it's free... Read all the rules... This is the government's job. Most of them are miss-labeled when you search by location without searching by subject. ED S 03-21-2013. 08:39 am #14 I have a Doz Spiral Drive Pin (holding a selection in the QC gear box) please email me [email protection] thanks 04-11-2013. 08:55 am #15 I'm looking for exactly the same stuff. I am looking for a good response.

Here's a link. McMaster-Carr Last Edited: 2013 04-13-2013 11:07 12-18-2013. 10:32 pm #17 13 Head Stocker's source will be evaluated if a person has a source. Is there anyone who has used that size A or AA sim assortment to get a handle (at least) what thickness is needed? These are: McMaster-Carr, these are: McMaster-Carr 12-18-2013. 10:54 pm #18 originally posted by S\_W\_Bausch 13-head Stocker, if anyone has a source, will be evaluated. Is there anyone who has used that size A or AA sim assortment to get a handle (at least) what thickness is needed? This: McMaster-Carr, this: McMaster-Carr Steve. I have an easy way to fit 13 Tool [Email Protection] 07-15-2014. 01:03 pm #19 machine parts supply we chase parts for you, so you can focus on your project. We have access to more than 20,000 suppliers. www.machinepartsupply.com 08-30-2014. 05:20 pm #20 Oregon Leather Company. Saddle, tack, harness, shoes, belts, clothes, etc. they have leather for it. I bought a 1.25 wide by 72+ inches long 1/4 thick strip for \$20. I sabbte the end using a small block plane cut into lengthward then stuck it with gorilla glue using a few pieces of angle iron and c clamp. A perfect run on wa 8A serial 403. They did not sell leather on machine tools belts before. Before.
